Dear Prof Whitty

I am aware that you were written to by the CEO of Blood Cancer UK on this issue. I am today acting entirely on my own behalf and have not discussed my actions with them. I am a blood cancer patient myself and previously worked as a medical director for several pharmaceutical companies.

But I have today referred your department to the MHRA and I have also asked the ABPI code of practice authority to look into why the pharma companies haven't done anything to correct the dangerous misinformation that has been put out by PHE about Covid19 vaccine efficacy in immunocompromised individuals.

This public complaint is outlined in an article at a group blog I run here which has a large visitor rate among blood cancer patients who are outraged not just at the misinformation but the lack of warnings, testings, protection and treatment for us:

<https://bloodcanceruncensored.com/lies-about-vaccines-and-the-immune-deficient-open-letter-to-uk-government-mhra-and-abpi-code-of-practice-authority/>

I also include a PDF of this and my complaint letters together with other relevant information so it is all in one place for you.

If you have any comment to make on this in the meantime I will of course append it to my article in the usual way.

Many Thanks,

Dr Adrian Warnock
